

**A Local Company.
A German Product.
A Global Brand.**

A Global Brand

Altenloh, Brinck & Co was founded in 1823 and was the first company to undertake the industrial production of screws in Germany. In 1967 the company revolutionised the industry with the invention of the SPAX universal screw, which has since conquered the world. The SPAX range has been continually developed and improved and has spread around the globe. SPAX is specified by architects, engineers and builders throughout Europe, America, Asia, Australia and New Zealand.

A German Product

At SPAX, we do not compromise on quality. Every SPAX product is designed and manufactured for a specific application. We guarantee that when used correctly, SPAX products will perform way beyond any inferior or cheaper product on the market. SPAX screws are certified as 100% Made In Germany.

We manufacture more than 50 million screws each day at our German factory in Ennepetal, including specialist screws for:

- Timber floorboards, MDF and DIY
- Window & door fastening, manufacturing & installation
- Decking, boardwalks, facades and outdoor construction
- Commercial framing and mass timber connections (CLT, LVL & Gluelam)
- Specialised accessories

A Local Company

In the Australian/New Zealand market, more and more builders, developers, architects, councils and landscape architects have discovered the advantages of dealing with a local company that's fully backed by a global corporation. SPAX Pacific has sales representatives servicing your area, with warehousing in Brisbane, Cairns, Auckland and Christchurch. We are more than happy to offer product demonstrations including engineering and design advice on your next project.
