

SPAX – “Made in Germany”  
**Guaranteed by us,  
certified by TÜV.**

Our SPAX brand product is globally available in the typical green packaging on which the origin can immediately be found on the address label: Ennepetal – the company headquarters and production location. And this is exactly where the TÜV certification “Made in Germany” for SPAX branded screws was conducted in the form of an elaborate testing procedure.

SPAX International is and remains connected to its location in Germany. And in doing precisely that it guarantees its customers a high level of safety, quality and continuity with the SPAX brand.

SPAX – “Made in Germany”

## MADE IN GERMANY

**SPAX – “Made in Germany”**  
Guaranteed by us,  
certified by TÜV.

Now with “certified  
proof of origin”.

“Made in Germany” as a guarantee for:  
**quality, innovation  
 and secure workplaces**

In times of globalisation, the product label “Made in Germany” is gaining importance amongst consumers as an important buying criterion. After all, the origin stands for quality, innovation and safeguarding of local work and training positions.

Many consumers therefore consciously select local products, because they trust their quality and because they want to support the respective business location. However, it is not always easy for the customer to verify the declaration “Made in Germany”.

### TÜV NORD “Certified Proof of Origin”: **for product clarity and consumer protection**

The technical inspection association TÜV NORD has developed the “Certified Proof of Origin” for the purposes of consumer protection and product clarity. For the first time, the customer will thus get a confirmation from an independent certifying body that the value creation of a product took place in the named country and also that the company is contributing to the strengthening of the national production location, e.g. through training and investment intensity.

TÜV NORD therefore awards the certification mark “Made in Germany” to companies which feel a special commitment towards the location of Germany and which prove this explicitly through their production conditions. Consequently, certified companies have to actively show their social responsibility and have to make a traceable effort to create and sustain work and training positions in the country of manufacture.

A clear commitment to quality and reliability:  
**SPAX International stands by  
 Germany as a production location**

SPAX has voluntarily subjected itself to this extensive TÜV examination procedure. The manufacturing process in the plant was examined closely by the TÜV auditors through audits on site, supplier interviews and document reviews. SPAX has passed all voluntary product tests in this context without any difficulties and has been awarded the protected certification mark “Made in Germany” for its SPAX screws.

The SPAX corporate philosophy was – and still is – to manufacture products of the highest quality at its domestic location in order to fulfil its high quality standards to the maximum extent. Now customers do not only have the SPAX promise, but also the official verification “Made in Germany”. In this way, SPAX International is making a conscious contribution to safeguarding Germany as a production location, and also to offering customers and partners the greatest possible transparency. Because it continues to be SPAX’s goal to produce high-grade, quality-controlled products. At the same time, social responsibility and customer interests are always kept in mind. Furthermore, the SPAX brand guarantees all customers the highest level of reliability and quality.
