Camping screw

NEW!

MADE IN
Germany

PRODUCT BENEFITS:

✘ **SIMPLE INSERTION**

Can be screwed in using a cordless screwdriver or handle (for bits), no hammering necessary.

✘ **IMPROVED HOLD**

Thanks to the thread, the camping screws achieve a sturdier hold than conventional tent pegs. Also suitable for use on harder and stony surfaces. Tempering also makes the screw ideal for use on awkward surfaces.

✘ **INCL. CORRESPONDING BITS**

In order to be able to use the set straight away, one T-STAR *plus* T30 and one T40 bit are included.

✘ **EASY TO TIGHTEN**

Loose screws are easy to re-tighten. It is not normally necessary to re-insert the screw.

✘ **FAST ASSEMBLY**

Easy insertion without much effort (both with a cordless screwdriver and handle).

✘ **T-STAR *plus* SYSTEM**

T-STAR *plus* BIT in combination with T-STAR *plus* drive for better force transmission and insertion.

✘ **COORDINATED RANGE**

Designed for big and small eyelets. Plastic discs protect tarp guylines (no friction when inserting screw).

THE SPAX CAMPING SCREW FOR OUTDOOR APPLICATIONS

When it comes to heavy-duty wood connections, the SPAX wood construction screw with washer head is in a league of its own. Now, we offer you the same quality for camping. Our camping screws offer huge advantages over conventional pegs for tensioning guylines.

Firstly, inserting and removing a screw with a cordless screwdriver is much faster than hammering in a tent peg – and requires no brute strength at all.

This is especially true for ground with dense plant roots, in which tent pegs often buckle due to lack of sufficient hold.

What's more, our screw means you can now wave goodbye to tent pegs as a notoriously painful tripping hazard.

Its ultra-flat washer head enables it to be inserted almost flush with the ground, making bloody toes a thing of the past.

Thanks to its wide diameter, this washer head offers enough hold to keep guylines durably ten-sioned. In order to ensure that the tent screw can fulfil its duty, it must be inserted into the ground at an angle (with the head pointing away from the tent).

With the complete screw set, you're ready for anything

The SPAX camping screws are available in a choice of two sizes in our set: the 6 x 160 mm version is best for ground with dense roots or loamy soil. If you require deeper anchoring, the 8 x 220 mm screw is the answer.

Both versions are protected against corrosion with our WIROX coating – this special surface permanently prevents rust, is chromium(VI)-free and considerably more environmentally friendly than conventional galvanised screws, for example. Despite WIROX, we recommend thoroughly cleaning our camping screws after removing them from the ground.

In addition to the camping screws in two lengths, our sets also include plastic washers for an even sturdier hold and two bits (T30 and T40) for the T-STAR *plus* drive.

USE:

- ✘ Slide on washers
- ✘ Screw into the ground at an angle with the head facing away from the tent

- ✘ Screw in until flush with the ground
- ✘ Suitable for all tent guylines and ground anchors

- ✘ Clean thoroughly after use

SPAX CAMPING SCREW

COMPLETE SET

12 x Washer head screws 8 x 220 WIROX

6 x Washer head screws 6 x 160 WIROX

18 x Washers

1 x Bit T-STAR *plus* T 30

1 x Bit T-STAR *plus* T 40
